DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a breathable film cover, classified in class 428, subclass 518+.
 - II. Claims 7-9, drawn to a method, classified in class 156, subclass 324+.
2. The inventions are distinct, each from the other because:
3. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as co-extrusion process.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. During a telephone conversation with Mr. Timothy J. Engling on April 27, 2005 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-6. Affirmation of this election must be made by applicant in replying to this

Office action. Claims 7-9 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1, 2 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fujita et al (U.S. Patent 4,781,976) with, as an evidence, Hawrylko et al (U.S. Patent 5,496,630).

Fujita et al disclose a skin covering comprising (a) a surface layer comprising a plasticized PVC resin, (b) a foam layer of plasticized cross-linking PVC resin and (c) a back layer of plasticized PVC resin (Example 1). The back Layer (c) functions as an adhesive (column 3, lines 20-21). Fujita et al disclose additive such as pigment, stabilizer etc. can be added to (a), (b) and (c) layers (column 2, line 26 to column 3, line 35). Fujita et al fail to disclose pigment such as metal particles.

Hawrylko et al disclose metal particles as pigment for PVC resin layer to obtain metallized surface appearance (abstract).

Therefore it would have been obvious to a person of ordinary skill in the art at the time of this invention made to utilize disclosure of Hawrylko et al to add metal particles to layer (a) to obtain metallized appearance.

9. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 3 deemed allowable because art of record does not teach or suggest clear (i.e. transparent) claimed second polyvinyl chloride layer.

10. Receipt of Information Disclosure Statements filed March 24, 2004 and July 19, 2004 is acknowledged and all references have been made of record.

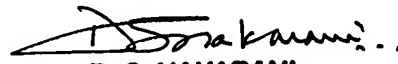

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner D.S. Nakarani whose telephone number is (571) 272-1512. The examiner can normally be reached on Tuesday-Friday from 7:00 am to 5:30 pm.
